(54) DISK REPRODUCING DEVICE

(57)Abstract:

PURPOSE: To realize reduction of the number of components in a whole device and miniaturization of the device.

CONSTITUTION: Regarding a disk drive capable of freely loading/unloading a tray mounted with the disk in a cabinet, one slider 41 out of a pair of sliders (40), 41 for supporting the tray 2 so as freely to be loaded/unloaded in the cabinet is served also as the operating member for the use of lock release of a lock mechanism for locking the tray 2 at a specified position in the cabinet. This slider 41 is slid in the direction of tray insertion by means of pushing an eject button 14 arranged on a front panel 13 of the tray 2, and the lock is released by moving a lock lever 69 of the lock mechanism to the direction capable of releasing the lock.

LEGAL STATUS

[Date of request for examination] 06.07.1999

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3405611

[Date of registration] 07.03.2003

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
